

## Localizing the SDGs: The role of youth in enhancing Sustainable Campuses

Venue \ Aula Gamma, Building 11

Date \ July, Thursday 13 \ 5.00-7.00 pm

**Objective** \ This event is aimed at providing a space for dialogue between students and academics to share ideas on sustainable development at the campus level.

**Context** \ On May 22, 2017 the event titled “Youth4SDGs” took place at Politecnico di Milano. Participants included members of nonprofit associations and foundations on the discussion of the role of youth in sustainable development, concerning the United Nations Sustainable Development Goals (SDGs) that were integrated as a part of the Paris Agreement 2015 Global Initiative.

This initiative is a follow-up of the Festival of Sustainable Development, including a working session where students and professors can discuss and share sustainable ideas.

Such session is the first implementation of a SDG working lab - deemed “SDGLab.0” - which represents an opportunity for students to have a critical and mainstream role in creating a more equal sustainable future in Polimi campus and using the SDGs as a tool to overcome local challenges and diversity.

The process outputs will be showcase in a campus-wide event hosted by Polimi, in collaboration with UN Sustainable Development Solutions Network Youth, in October.
